

## **In Your Area – Great Missenden, South Heath and Wendover**

Below are some of the concerns expressed in the last consultation.

This is a starting point to work together to clarify the local community's views and priorities.

---

### **Great Missenden**

- Concern about the impact of construction work on the hydrology of the Misbourne Valley, particularly the Misbourne chalk stream and the aquifer, from tunnelling.
  - Concerns over the implications for property prices.
  - Concerns regarding wildlife in the Misbourne Valley.
  - Concerns for implications for tourism and recreation in the area.
- 

### **South Heath**

- Concern about noise impacts as the trains enter and leave the tunnel.
  - Concerns over the implications of the construction period for the tunnelling in this area.
  - Concern over the impacts on amenity value.
  - Concern that the route has been raised in this area (meaning a shallower cutting).
  - Concern over the impact on Grims Ditch scheduled monument.
- 

### **Wendover**

- Concerns that the route will cause unnecessarily high levels of noise and visual impacts due to the proximity to the town.
- Concerns that the proposed viaduct will magnify the effects of operational noise.
- Concerns over potential impacts on property value.
